CAREER OBJECTIVE

Forward-thinking AI & Data Science undergraduate with practical experience in supervised and unsupervised learning algorithms. Proficient in Python, SQL, and building machine learning models to solve real-world problems. Seeking a dynamic role to apply my data manipulation skills and analytical mindset to deliver high-quality, data-driven solutions. My ambition is to contribute to innovative AI projects that solve complex challenges and grow my skills in real-world machine learning applications.

EDUCATION

Bachelor of Science in Computer Science and Artificial Intelligence Helwan University (Capital University)

| *2024 –2028*

GPA: 3.33

EXPERIENCE

Game Development Mentor IEEE Student Branch Sept, 2025 (Game Development Camp), Giza

- Mentored teams through the end-to-end lifecycle of 2D and 3D game prototyping using Unity and C#, resulting in a 100% project completion rate for the development camp.
- Translated complex software architecture and logic building concepts into accessible training modules, accelerating the technical learning curve for participants by 2 weeks.
- Evaluated 4 final game projects against standardized metrics, delivering actionable code quality and system design feedback that improved team performance scores by 95%

AI & Data Science Trainee Jul, 2026 – Present Digital Egypt Pioneers Initiative (DEPI), Egypt

- Engage in rigorous training within the IBM Data Scientist curriculum, focusing on machine learning and predictive analytics.
- Engineer features and preprocess complex datasets using Python and SQL to build foundational data models.

COURSES & CERTIFICATIONS

Programming for Everybody (Getting Started with Python) Aug, 2026

University of Michigan (Coursera)

Introduction to Data Science Jul, 2026

Cisco Networking Academy

SKILLS

Proficient

- **Programming Languages:** Python, C++, C, Java.
- **AI & Data Science:** Machine Learning, Predictive Analytics, Data Wrangling.
- **Databases:** SQL.
- **Core CS Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Systems Analysis, Operating Systems.

Intermediate

- **Web & Databases:** MySQL, HTML, CSS, Bootstrap.
- **Tools & Technologies:** Git, GitHub, Cisco Packet Tracer.
